

```
#include <stdio.h>
#include <stdlib.h>
int main()
{
    FILE *file;
    file = fopen("example.txt", "w");
    if(file == NULL)
    {
        printf("Error opening file\n");
        return 1;
    }

    fprintf(file, "Hello, World!\n");
    fprintf(file, "This is file management example.\n");
    fclose(file);
    file = fopen("example.txt", "r");
    if(file == NULL)
    {
        printf("Error opening file\n");
        return 1;
    }
    char buffer[100];
    while(fgets(buffer, sizeof(buffer), file) != NULL)
    {
        printf("%s", buffer);
    }
    fclose(file);
    return 0;
}
```

Hello, World!
This is file management example.
